Personal, Social and Emotional Development (PSED)

We will continue to enjoy our PSHE 'Jigsaw Jenie' sessions. We will practise sitting together in a circle, taking turns to speak and listening carefully to one another. Using Jenie, we will learn that when we are holding her, it is our turn to talk, helping us to understand the importance of being respectful and listening to our friends.

Expressive Arts and Design (EAD)

We will be getting creative as we explore colour, shape, pattern and different artistic techniques. Using the story *Mouse Paint* as inspiration, the children will investigate colour mixing through a range of fun, hands-on experiments, discovering what happens when different colours are combined. We will create exciting firework pictures using salad spinners and experiment with different printing techniques, using everyday objects such as cardboard tubes and apples to explore the shapes, patterns and effects we can create.

Communication and Language (CL)

We will encourage children to recall and talk about past experiences while looking at firework displays over London. We will develop children's vocabulary by introducing a range of descriptive words linked to what they can see and hear, such as sparkle, twinkle, bright, colourful, zoom, whizz, bang and pop.

02.11.26

Nursery Learning

Fireworks

Literacy

This week, we will continue to develop our **listening and sound awareness** through our Little Wandle sessions. We will listen carefully for the phoneme **'s'** in words and have fun joining in with the rhyme **'The Grand Old Duke of York'**.

Physical Development (PD)

We will develop our gross motor skills through a firework dance, using large movements as we stretch, reach, spin and move our bodies in different ways to represent fireworks.

Maths

We will continue to develop our understanding of colours and numbers, practising recognising and naming colours and developing our counting skills through play and practical experiences.

Understanding the World (UW)

We will be learning about fireworks through our senses, thinking about what we might see, hear and smell. We will watch firework displays on the interactive whiteboard and encourage the children to describe what they notice and share their own experiences. We will also talk together about firework safety and how we can keep ourselves safe.
