

HOLMESDALE COMMUNITY INFANT SCHOOL

Intimate Care and Toileting Policy

Review Date December 2026

Young children may experience difficulties with toileting and intimate care procedures for a variety of reasons, including but not limited to SEND and medical needs. All the children we work with have the right to be safe, to be treated with courtesy, dignity, and respect, and to be able to access all aspects of the education curriculum. We have an obligation to meet the needs of children and children with delayed personal development in the same way as they would meet the individual needs of those with delayed language, or any other kind of delayed development. Children should not be excluded from normal school activities solely because of incontinence, neither should they be sent home to change, or be required to wait for their parents or carers to attend to them at school. However, if children are so badly soiled (for example, if all their layers of clothing are soiled extensively or they have not told an adult and have been in soiled underwear for a long time) that they cannot be cleaned effectively in the school environment and there are concerns that this could lead to soreness or infection, parents/carers will be asked to collect them so that they can be bathed.

The aims of this policy and associated guidance are:

- To safeguard the rights and promote the welfare of children.
- To provide guidance and reassurance to staff involved in intimate care.
- To assure parents and carers that staff are knowledgeable about personal care and that their individual concerns are taken into account.
- To remove barriers to learning and participation, protect from discrimination, and ensure inclusion for all children as pupils.

Definition of Intimate Care

‘Intimate Care’ can be defined as care tasks of an intimate nature, associated with bodily functions, bodily products and personal hygiene, which demand direct or indirect contact with, or exposure of, the sexual parts of the body. Intimate care tasks specifically identified as relevant at Holmesdale Infant School include:

- Dressing and undressing (underwear)
- Helping someone use the toilet
- Wiping intimate parts of the body

Definition of Personal Care

‘Personal Care’ generally carries more positive perceptions than intimate care.

Those personal care tasks specifically identified as relevant here include:

- Skin care/applying external medication
- Feeding
- Administering oral medication
- Hair care
- Dressing and undressing (clothing)
- Washing non-intimate body parts
- Prompting to go to the toilet

Basic Principles

Children's intimate care needs cannot be seen in isolation or separated from other aspects of their lives. Encouraging them to develop independence and participate in their own intimate or personal care should therefore be part of a general approach towards facilitating participation in daily life. Staff should bear in mind the following principles:

- Children have a right to feel safe and secure.
- Children have a right to an education and schools have a duty to identify and remove barriers to learning and participation for pupils of all abilities and needs.
- Children should be respected and valued as individuals.
- Children have a right to privacy, dignity and a professional approach from staff when meeting their needs.
- Children have the right to information and support to enable them to make appropriate choices.
- Children have the right to be accepted for who they are, without regard to age, gender, ability, race, culture or beliefs
- Children have the right to express their views and have them heard. Pupils who need support to express their views will be encouraged to have their views expressed through an advocate, such as a parent or carer.

A child's Intimate/Personal care plan/Education Health Care Plan should be designed to lead to independence.

It is essential that all staff are familiar with the school or setting's Safeguarding / Child Protection Policy and procedures, with agreed procedures within this policy and with the child/young person's own care plan.

Intimate care may involve touching the private parts of the child/young person's body and therefore may leave staff more vulnerable to accusations of abuse. It is unrealistic to eliminate all risk but this vulnerability places an important responsibility on staff to act in accordance with agreed procedures.

Good Practice Guidance Working with parents and carers

Establishing effective working relationships with parents/carers is a key task for all schools and is particularly necessary for children/young people with specific care needs or disabilities. Parents/carers are encouraged to work with professionals to ensure their child's needs are properly identified, understood and met. Parents/Carers are closely involved in the preparation of Individual Medical Plans or Toileting Plans.

Cross gender care.

There is positive value in both male and female staff being involved in intimate/personal care tasks, however, the school recognises that it may make some parents, carers or the child uncomfortable, to have a member of staff of the opposite sex to attend to toileting or other intimate needs. The school will work in partnership with parents/carers and the child to ensure that their views and needs are respected and where possible an adult of the same sex as the child will meet their intimate care needs.

Examples of positive approaches to intimate/personal care which ensure a safe and comfortable experience for the child:

- Get to know the child beforehand in other contexts to gain an appreciation of his/her mood and systems of communication.
- Have a knowledge of and respect for any cultural or religious sensitivities related to aspects of intimate care.
- Speak to the child by name and ensure they are aware of the focus of the activity. Address the child in age-appropriate ways.
- Give explanations of what is happening in straightforward and reassuring way.
- Agree terminology for parts of the body and bodily functions that will be used by staff and encourage.
- Children to use these terms appropriately – this forms part of the toileting plan.
- Encourage the child to undertake as much of the procedure for themselves as possible, including wiping intimate areas and dressing/undressing.
- Seek the child's permission before undressing if he/she is unable to do this unaided.
- Provide facilities that afford privacy and modesty.

Procedures:

Holmesdale Infant School recognises that an individual's intimate care requirements do not always conform to regimental timetables and will therefore allow children to have access as appropriate without adverse comment.

Children are encouraged to go to the toilet during break and lunch times, although this depends upon individual needs and circumstances. Children may be accompanied to the toilet by a member of staff as needed. The adult will wait a discrete distance from the toilet entrance.

Nursery:

Holmesdale Infant School recognises that children starting at Nursery may not be toilet trained.

- Nursery Staff will assist and advise parents on toilet training strategies.
- Staff will agree with parents on how best to encourage toilet training at school to ensure consistency with home.
- Each Nursery child will bring in a change of clothes and /or pull ups (if appropriate).
- The Nursery has a bag containing wipes, disposable gloves and spare clothes.
- Children who have wet will be supported to wipe and change themselves within the Nursery environment.
- Children who have soiled themselves will be supported in the disabled toilet as outlined below.
- Wet or soiled clothing will be returned discreetly to parents as described below.
- Wet/soiled nappies/pull ups will be disposed of in the nappy bin which is kept in the disabled toilet.

Toileting Plans:

If a child enters reception without being toilet trained, a meeting will be arranged with the child's parent/carers to put a toileting plan in place to enable the child to gain independence.

Facilities:

Holmesdale Infant School actively supports the provision of open access to well-maintained, clean, private and safe toilet facilities throughout the school day. Toilets are checked to ensure cleanliness throughout the school day. All toilet areas have properly maintained supplies at a convenient height.

Toileting Accidents:

Discretion and sensitivity are important, as many children are embarrassed by wet or soiled underwear. Independence is encouraged when children are changing, cleaning and drying themselves. If necessary, a member of staff can assist.

- Reception children with toileting needs **may** bring in a bag of spare clothes as we recognise that some children feel more comfortable in familiar clothing.
- Each reception class has a bag containing wipes, disposable gloves, and spare underwear/clothes.
- Disposable gloves and wipes are also available in the office and disabled toilet or in a classroom if part of a child's individual care plan.

Unless they have been contacted because a child has needed washing, parents are informed at the end of the day if a child has had a toileting accident. Wet / soiled clothing will be put into a plastic bag and returned discretely. If clothing is heavily soiled and parents have requested it, it can be disposed of in the bins provided.

KS1 parents may provide extra clothing for their child if it is known that they have regular accidents. The school provide spare clothing for unexpected emergency needs. Children who require additional support with toileting or those have soiled or wet themselves severely are taken to the disabled toilet to ensure privacy. The member of staff who accompanies them must leave the door ajar and the privacy curtain drawn across in accordance with the school's safeguarding procedures. If any member of staff has concerns relating to safeguarding issues they should advise the DSLs immediately.

Note: In line with Disability Discrimination legislation, no child will be excluded from school or not admitted to school because of issues related to toileting. In this case an individual plan is devised. Parents are informed immediately and advised to collect their child, if it is considered that the soiling is due to illness or the child may continue to be embarrassed or uncomfortable.

If the child cannot be moved due to the severe nature of the soiling or wetting, the class should move to another space e.g. the outside classroom or the atrium while the child is cleaned. One adult should take the class while another looks after the child, an extra adult may be called if needed. While there are no showering facilities at Holmesdale Infant School every effort is made to ensure the child is clean. In cases where it is felt that the child can move and needs the toilet, they should be taken to the nearest available toilet. Once they have used the toilet, they should be cleaned according to the procedures described above and on the previous page.

Curriculum:

The children are encouraged to respect the toilet facilities and each other via PSHE lessons. Hand washing is a consistent part of the toilet routine and good hand washing procedures are encouraged and taught.
