Personal, Social, Emotional Development

In our Jigsaw Jenie lesson this week we will be learning why it is important to be kind and use gentle hands.

Expressive Arts & Design

This week we will use our observational and painting skills to decorate a lamp that we have made using clay.

Communication, Language and Phonics

We are continuing to develop our listening skills and will be learning the new phonemes, **h, b, f** and **l.**
We will be learning the tricky word:

the

RECEPTION LEARNING

Physical Development

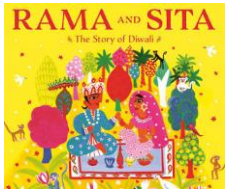

This week we are continuing to develop our finger muscles with lots of fine motor activities. We will also be strengthening our gross motor skills by using brooms and rollers in the outside classroom and using chalk to draw fireworks on the playground.

Literacy

As we learn about Diwali, we will be reading the story of Rama and Sita. In phonics we will begin to segment and write the CVC (consonant, vowel, consonant) words: dog, ten, red, mum and kid. We will take this segmenting knowledge into our learning and have a go at writing some wow words for fireworks. For example; pop, hiss, snap and crack.

Please return all books on Mondays.

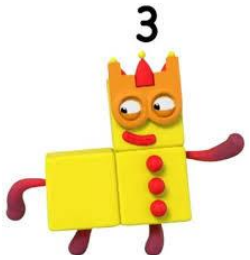

As you enjoy this week's book, see if you can spot any features in the text e.g. bold words, speech bubbles, words in italics etc.

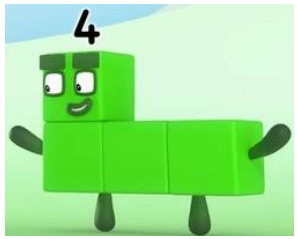

Maths

This week in maths we will explore how numbers can be composed of 1's and, from this, begin to investigate the composition of 3 and 4.

Understanding the World

This week we will be talking about celebrations, and particularly the festival of Diwali. We will think about similarities and differences between ourselves and others, and among our families, communities and traditions.

What do you know about celebrations?
